

Mohammed Said

Full-Stack Developer · React / Node.js · AI & Automation

mohammedsaidaker@gmail.com · [msaid-dev.vercel.app](#) · [linkedin.com/in/mohammedsaid](#) · [github.com/mohammedsaid21](#)

I build full-stack products from idea to production — delivering real applications used in real-world scenarios. With 5+ years of experience, I focus on turning ideas into scalable, reliable solutions by handling the full development process from frontend to backend to deployment. I go beyond implementation — thinking through product decisions, improving user flows, and ensuring what gets built is both **functional and valuable**. Experienced in AI integration and RAG systems, building intelligent applications that combine LLMs with real product workflows.

FEATURED PROJECTS

Ghaymah — MENA's First Arabic Cloud Platform [500+ Developers · 10,000+ Deployed Apps]

[https://ghaymah.systems](#) · React.js · Next.js · TypeScript · Full-Stack

- Worked as a Full-Stack Developer on Ghaymah — the first Arabic cloud infrastructure platform, positioned as a MENA alternative to Vercel and DigitalOcean.
- The platform serves 500+ active developers across 18 Arab countries, with 10,000+ apps deployed and 99.97% uptime.
- Delivered a complex, multi-product dashboard covering compute, managed databases, container registry, CI/CD pipelines, AI services, and a one-click app marketplace — all in a clean, bilingual (AR/EN) interface.

Mithal — Arabic-First Privacy Search Engine [Built at Ghaymah · Arabic & Privacy-First]

[https://mithal.space](#) · React.js · Next.js · TypeScript · Ghaymah Infrastructure

- Contributed to Mithal — a privacy-respecting Arabic search engine built on Ghaymah's infrastructure, with zero tracking and Arabic-first indexing.
- Focused on delivering a fast, clean, and minimal UI that reflects the product's core values: no surveillance, no ads, pure search.

RAG Knowledge System + Tawjihi Study App [Full-Stack AI · Education]

Python · Flask · Vector DB · Embeddings · React Native · iOS & Android

- Built a Retrieval-Augmented Generation (RAG) system from scratch using Flask and Python — users upload documents and get LLM-powered answers grounded in their own data.
- Separately built a mobile app for Tawjihi (General Secondary Certificate) students — featuring a personalized study plan per subject, topic explanations, practice tests, and step-by-step study guidance.
- Both delivered as React Native apps with a polished cross-platform experience on iOS and Android.

Bunyx — Enterprise ERP Dashboard [Enterprise · Industrial ERP]

React.js · TypeScript · Vite · REST API · Role-Based Auth

- Built the frontend for a full-featured ERP system — centralizing departments, machines, shifts, suppliers, raw materials, quality inspections, and production tracking in a single role-based interface.
- Delivered reusable component library, data tables, and reporting dashboards for complex daily industrial operations.

Sticky.onl — AI-Powered SaaS Feedback Tool [Founder · 100+ Active Users]

[https://sticky.onl](#) · React.js · Node.js · Supabase · AI Integration

- Founded and shipped a full SaaS product independently — an AI-enabled platform helping companies collect, organize, and act on user feedback.
- Grew to 100+ active users organically; designed the complete product experience from onboarding to real-time dashboard.
- Architected a scalable multi-tenant backend with role-based access control and AI-assisted feedback categorization.

EXPERIENCE

Full-Stack Developer

2025 – 2026 · 1 Year

Ghaymah · [ghaymah.systems](#)

- Built and maintained full-stack features for Ghaymah — MENA's first Arabic cloud platform serving 500+ developers across 18 Arab countries.

- Contributed to Mithal (mithal.space), a privacy-first Arabic search engine built on Ghaymah's infrastructure.
- Worked across the full stack: frontend dashboards, backend APIs, and infrastructure-connected UI for compute, databases, CI/CD, and AI services.

Freelance Full-Stack Developer & Product Consultant

2021 – Present · 5 Years

Independent — Remote Clients (Canada, MENA region)

- Managed full project lifecycles — discovery, scoping, architecture, development, and post-launch support — across 6+ shipped products.
- Delivered AI-powered systems including RAG pipelines and LLM-integrated workflows for real international clients.
- Founded and launched Sticky.onl — a SaaS feedback tool now serving 100+ active users.
- Taught two advanced React courses on MostaqI.com — trainees went from zero to production-level code.

TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · Redux · React Native · React Hooks · Framer Motion
Styling	Tailwind CSS · Styled-components · MUI · CSS / Sass
Backend	Node.js · Express.js · Flask · Python · Supabase · REST APIs · JWT Auth
AI / ML	RAG Systems · Vector Databases · LLM APIs · Embeddings · Prompt Engineering
Automation	n8n · Webhook Design · API Integrations · LLM Workflow Pipelines
Database	MongoDB · PostgreSQL (Supabase) · Vector Stores
Delivery	GitHub · Vite · Jest · Vercel · CI/CD · Project scoping & client management

EDUCATION & CERTIFICATIONS

Palestine Technical College

B.S. Software Engineering · Sep 2018 – Jul 2023

Certifications

- React Shopping Cart – Udemy
- React Native: The Practical Guide [2023]
